

Stefan STANEV, 2017

**Botany for everyone**

Paisii Hilednarski Univ. Press, Plovdiv  
164 pp., paperback. ISBN: 978-619-202-213-6

The author presents little known and intriguing facts about the vascular plant diversity in Bulgaria – about the scientific and vernacular names, record-maker plants in the Bulgarian nature, interesting adaptations in the biology of the species, endemics and relicts, parasitic plants, most popular medicinal plants, exotic and ornamental plants, plants in the Bulgarian folk poetry, beliefs and proverbs, etc. The book reads very well and will be of interest to any naturalist or anyone curious about the wonderful world of plants.
